OUR VENDING MACHINES

MAXLINE

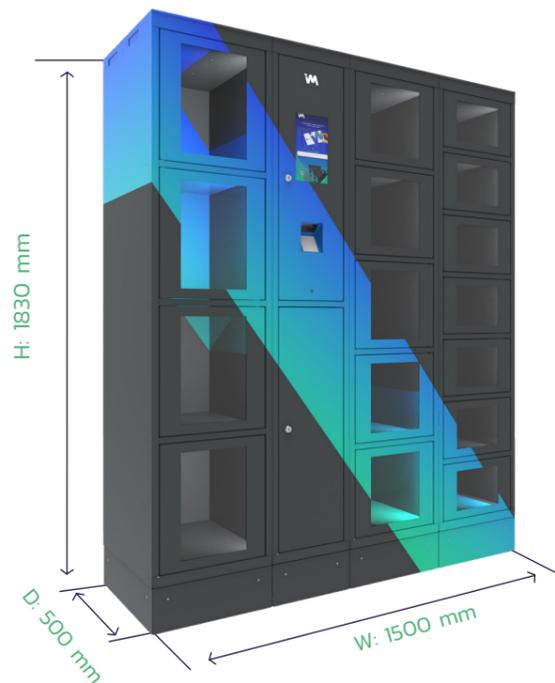

SaveProMAX

Our **top vending** machine offers a **highly optimizeable**, complex solution in inventory management processes. SavePro is optimal for low number of stock keeping unit with high consumption. The tools are easily accessible, their use can be tracked and they are available 24 hours a day. Cost reduction is achieved quickly, our SaveLog Smart software makes accurate search and filtering options visible with **easy-to-integrate individual functions and complex product management**.

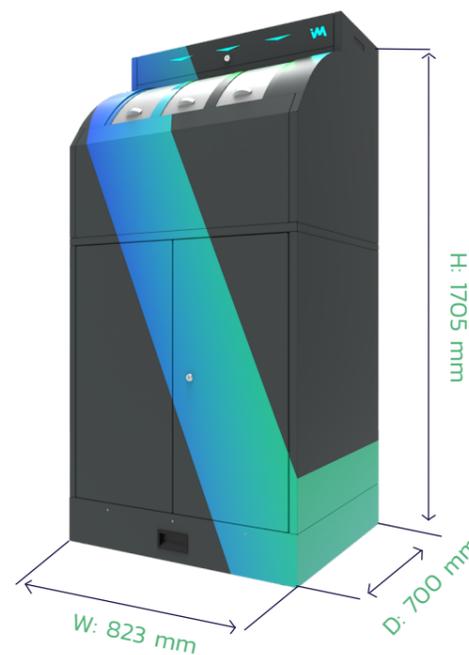

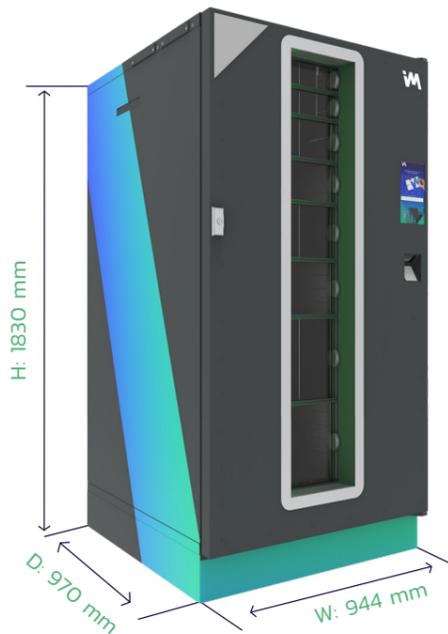

SaveSpringMAX

SaveSpring MAX is recommended for companies where a wide variety of production and safety equipment is used. The vending machine that can **safely store and dispense up to 540 different products at once**. It is currently one of the most **versatile solutions**, as it combines multiple functions and has no issues in expensing products, offering rental, tracking or return of used items. With the background of SaveLogSmart software, SaveSpringMAX records all user transactions, which can be retrieved and filtered afterwards.

SaveBoxMAX

The SaveBoxMAX **locker-type machine** storage units **can be combined in different sizes**. All devices can be systematically placed and easily accessed in the warehouse or office building. This type of machine offers a **unique rental solution** to help in tracking valuable tools and assets. The **scaling system** optimizes all of the small, medium-sized or fragile products. The transaction data of SaveBoxMAX can be easily customized by our latest developed SaveLogSmart software with various systems and online services.

SaveReturn

SaveReturn is ideal for companies **needing controlled and efficient management of tool returns**, particularly for tracking used or contaminated items. It ensures precise **cost control, environmental sustainability, and integrates seamlessly with other systems** like SavePro and SaveBox. With automated notifications for bin capacity and real-time monitoring, SaveReturn supports organizations handling hazardous or reusable materials, optimizing the return process for increased safety and compliance.

SaveBoxMAX H

The SaveBoxMAX H unit offers a **unique rental solution** to help in tracking valuable tools and objects, and prevent them from disappearing. It is available in different sizes which allows to design an individual **locker setup perfectly suited to any needs**. Using this setup, powered by IVM's **own developed** SaveLogSmart system, it is possible to optimize the distribution of small and medium-sized or even fragile products in the production area or in any office building.
