

DEFENCE AND SECURITY PACKAGING

HEAVY-DUTY SOLUTIONS

UN CERTIFIED & CUSTOMIZED

Innovative Defence Packaging Solutions by Nefab

Ensuring Superior Protection Across the Supply Chain

Nefab designs and manufactures complete packaging solutions that provide solid protection during transport, storage, and in the field. We develop lightweight, high-quality solutions that save resources throughout the entire supply chain.

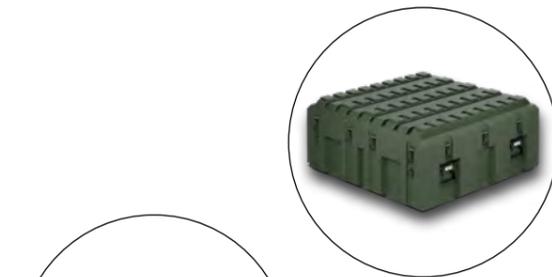

Our packaging solutions have been tested and approved according to various military specifications. We are a tier-one supplier for

some of the largest NATO military forces in the world, offering a multitude of defence packaging solutions.

Nefab holds numerous certifications for dangerous goods, covering more than 600 different boxes, all of which are accredited according to UN standards.

SOLUTIONS OVERVIEW

Multimaterial approach

RUGGEDIZED PLASTIC BOXES
Ruggedized case body made from impact-resistant LDPE material

PLYWOOD BOXES
Unique combination of plywood and galvanized steel

WATERTIGHT CASES
Injection molded shell made of polypropylene (PP)

UN CORRUGATED BOXES
UN 4GV certified to meet industry standards

ALUMINIUM BOXES
Resistant against corrosion and extreme temperatures

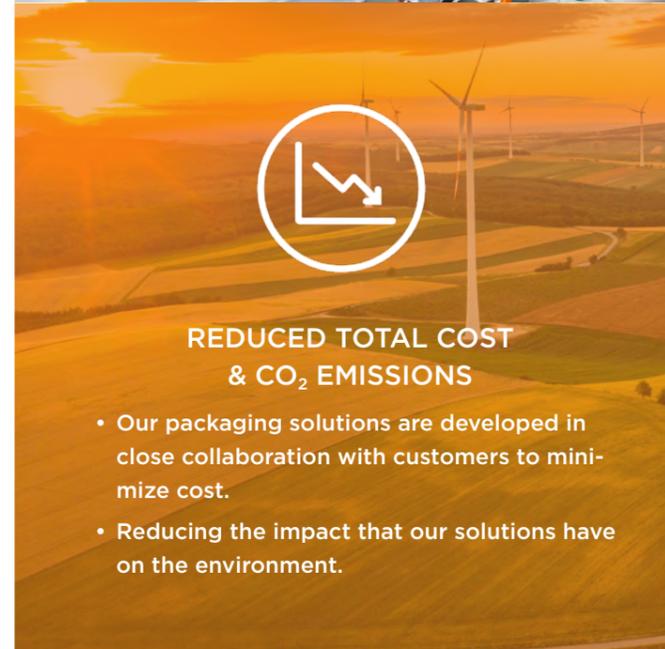

UN CERTIFIED DEFENCE PACKAGING SOLUTIONS

- Over 600 certifications according to UN standards.
- Engineered packaging solutions supported by a global network of over 300 engineers.
- Solutions compliant with: NATO (Stanag), MIL-STD & MILSPEC, UN, ASTM/ISTA, NEN, and ISO.

SAFE DELIVERIES & EFFICIENT HANDLING

- Lightweight solutions for efficient handling.
- High-quality solutions to ensure safe deliveries.
- Complete packaging solutions for all your needs.

REDUCED TOTAL COST & CO₂ EMISSIONS

- Our packaging solutions are developed in close collaboration with customers to minimize cost.
- Reducing the impact that our solutions have on the environment.

Protecting Critical Assets

Customization and adaptability

Our packaging solutions are designed to meet the diverse requirements of the defence segment, offering customization options to accommodate a wide range of equipment and materials. We understand that different defence applications demand unique packaging solutions, and we use our expertise to tailor our products to meet those needs.

Being a tier-one supplier for some of the largest NATO military forces in the world, we offer a multitude of highly customized defence packaging solutions abiding by the various standards and norms set by: NATO (STANAG), MIL-STD & MIL-SPEC, ISTA/ASTM, UN, NEN, and ISO.

Ammunition & Explosives: Our packaging solutions are engineered to safeguard ammunition during transit and storage. With specialized compartments and materials that resist moisture and impact, our cases ensure that ammunition remains in optimal condition, ready for deployment when needed.

Marine & Ship Building: From sensitive electronics to heavy machinery, our packaging solutions for naval equipment are built to withstand the challenging maritime environment. We offer

corrosion-resistant materials and waterproof cases to protect vital components from saltwater exposure and harsh conditions at sea.

Army & Vehicles: Military vehicles and their components demand robust packaging solutions to handle the transport and deployment. Our packaging is designed to protect vehicle parts, engines, and accessories from environmental exposure, mechanical damage, and logistical challenges, ensuring that all components arrive ready for immediate use.

INNER VERSATILITY & STACKING

AIR FORCE & AEROSPACE

Delicate aerospace components require precision-engineered packaging to prevent damage during handling and transportation. Our customizable packaging solutions offer cushioning and shock absorption capabilities to safeguard sensitive aerospace parts from vibration and impact, ensuring they arrive at their destination in perfect condition.

UAVs & ACCESSORIES

Unmanned Aerial Vehicles (UAVs) and their accessories require specialized packaging to ensure their precision components are protected during transport and storage. Our solutions offer tailored cushioning materials to secure UAVs, providing maximum protection against impact, vibration, and environmental factors.

COMMUNICATION & NAVIGATION

With the increasing reliance on advanced communication systems, our packaging solutions for telecom equipment prioritize both protection and accessibility. From rack-mountable cases for server equipment to ruggedized containers for satellite communication gear, we offer tailored solutions that meet the unique demands of telecommunications deployments in the field.

HEAVY-DUTY SOLUTIONS

Nefab offers packaging solutions and logistics services that save resources in supply chains. Our multi-material approach, including wood, plywood, steel, fiber-based, and plastic packaging, provides our customers with a wide range of options to choose from based on their specific needs.

Additionally, Nefab's logistics services cover various aspects of the supply chain, such as receiving, inspecting, storing, picking, kitting, packing, refurbishment, and transport loading. This end-to-end service ensures that customers can rely on Nefab for efficient handling and transportation of their goods.

Another essential aspect of our offerings is the focus on sustainability. With GreenCalc™, Nefab's trusted LCA (Life-cycle Assessment) software, we measure and analyze every step of our customers' supply chains. By using this data-driven approach, in collaboration with our customers we develop smarter solutions that reduce cost and environmental impact in supply chains.

Global Engineering Resources for Customized Packaging Solutions Meeting UN and NATO standards

Our commitment to quality and compliance is shockproof. Any newly developed packaging solution undergoes rigorous type approval tests to ensure that it meets the requirements set forth by organizations such as the UN and NATO. This includes thorough testing of interior packaging to guarantee protection during transit and storage. Nefab's worldwide engineering resources include 6 ISTA certified test labs, strategically located across the globe.

Services

In addition to our design and manufacturing capabilities, Nefab offers services to streamline your supply chain operations. From lab testing to ensure product integrity to contract logistics solutions including warehousing, just-in-time deliveries or refurbishment that optimize distribution, as well as digital services for enhanced visibility and efficiency, we provide end-to-end support to meet all your packaging needs.

With Nefab as your partner, you can trust that your packaging challenges will be met with innovative solutions backed by global expertise and commitment to quality and compliance.

Nefab has multi-material design and production capabilities, allowing us to develop packaging solutions from a diverse range of materials. Whether your requirements call for the strength of corrugated cardboard, the durability of wood, or the versatility of plastics, we have the expertise to deliver packaging solutions that excel in both performance and reliability.

Customized Packaging Solutions

- 6 ISTA certified test labs worldwide
- Global engineering design resources
- UN and NATO compliance

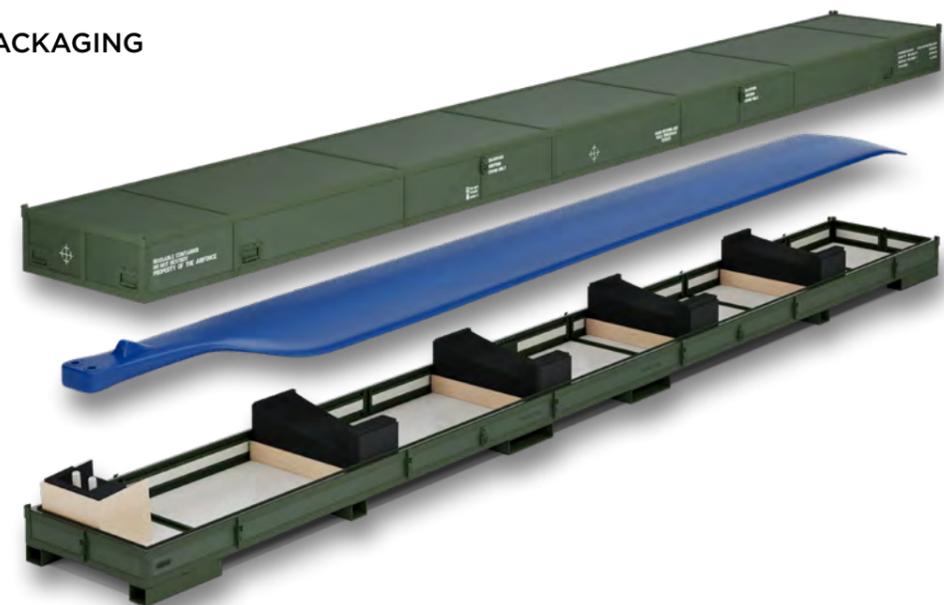

Logistics Services

End-to-end optimization - Experience the synergies of bundling logistics and packaging.

OUTER PACKAGING

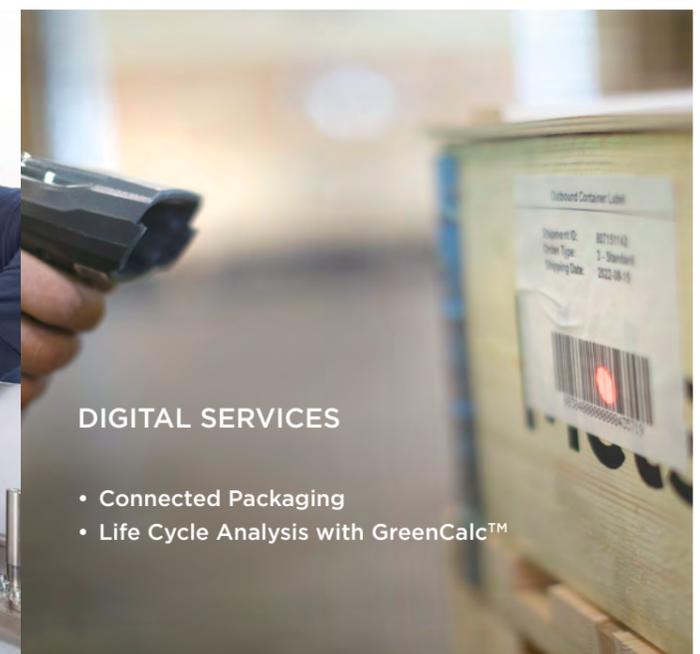

INNER PACKAGING

LOGISTICS SERVICES

- Warehousing
- Packing
- Just-in-Time deliveries
- Refurbishment

DIGITAL SERVICES

- Connected Packaging
- Life Cycle Analysis with GreenCalc™

Minimize Your Environmental Impact Together with Nefab

With the help of GreenCalc™, we can support your green initiatives by:

- Evaluating the environmental impact of current and potential packaging solutions.
- Identifying areas of improvements which can be used in the development of a new packaging design using sustainable materials.
- Quantifying a large range of climate affecting metrics across a detailed multi-criteria analysis.
- Implementing engineered, complete packaging solutions that are optimized in terms of total cost and environmental impact.

GreenCalc™: enabling data-driven solutions for sustainable supply chains

About Nefab

Nefab saves environmental and financial resources by optimizing supply chains. We do this by innovating together with our customers to create smarter packaging and logistics solutions while always respecting people and high ethical standards. This contributes to a better tomorrow for our customers, for society and for the environment.

With more than 75 years of experience combined with competence and presence in more than 38 countries, we offer global

solutions and local service worldwide to companies in industries such as Defence, Telecom, Datacom, Semicon, Energy, Healthcare equipment, Mining & Construction, and LiB & E-mobility. Nefab Group has over 4700 employees spread across 38 countries, with a yearly turnover of 10.3 BSEK.

The owners are the Nordgren/Pihl family and FAM AB, a privately owned holding company within the Wallenberg Ecosystem.

WE SAVE RESOURCES IN SUPPLY CHAINS, FOR A BETTER TOMORROW
