About Us

"Johari Stonex Industries is a Private Limited Company incorporated [Pursuant to sub-section (2) of section 7 of the Companies Act 2013 and rule 8 of the companies (Incorporation) Rules, 2014] by Ministry of Corporate Affairs, Government of India under CIN No. U51432RJ2014PTC046544.

We are manufacturers, exporters and importers of a wide variety of stones and have a competent team of professionals to give the best possible product quality. We provide all kinds of stones widely used in residential and commercial purposes and believe in meeting customer's requirements as our fundamental objective."

Johari Stonex Industries Pvt. Ltd. having Headquarter at JAIPUR, Rajasthan, India, offer an extraordinary selection of granite, marble, slate, quartzite, sandstone, limestone and mosaics. Unique custom finishes and sizing options are also available. We are known world wide for our reliable customer service. Our endeavour is to provide value for money to our customers and to make every single deal a pleasure. We can mix and match containers as per clients requirements so that client orders only what his immediate needs are and avoids carrying expensive extra inventories.

We strive excellence in customers service, quality and integrity in every aspect of our business.

"We Deliver what we promise". Please feel free to contact us and also provide your valuable feedback/ suggestions to us.

Facility

With our state-of-the-art processing facilities, we ensure the best quality products with the time bond deliveries.

Packaging

The packing of material is done as per the buyer needs. The standard practice is seaworthy wooden pallets with polythene sheets for slabs and corrugated seaworthy wooden crates with polythene sheets and thermocol for tiles and cut to size orders. The logistic part for overseas consignments is 20 ft heavy duty containers and for domestic trades it is heavy body open roof lorries. We have proper packing, crating, stuffing and dispatch of cargo thus ensure safety of the material in transit”

Slate & Quartzite

Slate is an extraordinary and versatile material with an unique look. It has very low porosity that makes it stain resistant and easy to maintain. It has a fine to medium grained surface texture thus renders a very graceful, natural finish to any building. Quartzite can be cleft like slate or can be smooth and more similar to marble and sandstone in appearance. The major difference between slate and quartzite is quartzite's ability to withstand many freeze-thaw cycles.

SPECIFICATIONS

Tiles:

10x10, 10x20, 10x30, 10x40, 10x60 CM
20x20, 20x40, 20x60 CM
30x30, 30x60, 60x60, CM

Slabs:

180x100 CM +, 240x160 CM +

Any other size and thickness on demand.

Thickness:

Natural Split: 10-15 MM, 10-20 MM
Calibrated / Sawn: 10, 12, 15, 18, 20, 30 MM

Edges:

Hand Cut, Machine Cut

Granite

Granite began its life as liquid magma within the earth's core. Granite is a hard, crystalline, ingenious rock formed from extreme heat, comprised of various minerals such as quartz and feldspar. Dimensional granite specifications include high load bearing capacity, flexibility of cutting, ability to yield thin and large slabs and above all durability. Granite is a very strong and durable stone. It takes heavy gloss polish, popularly used as architectural stone for interior and exterior walls, floors and monumental stone.

SPECIFICATIONS

Gangsaw Slabs:

270 x 160 CM+ (20 / 30 / 40 MM Thick)

Vertical Slabs:

180 x 60 CM+ (18 / 20 / 30 MM Thick)

Paving Stones:

10x20, 20x30, 30x40, 40x40 CM
(40 / 50 / 60 / 70 / 80 MM Thick)

Tiles:

30x30, 40x40, 50x50, 30x60, 40x60, 60x60 60x90,
90x90 CM & Cut To Size (18 / 20 / 30 MM Thick)
Any other size and thickness on demand.

Marble

Marble is a metamorphic rock resulting from the re-crystallization of limestone softened from heat and pressure. Main constituents are calcium and dolomite. Hardness ranges from 2.5 to 5 on the MOH scale. Marble is usually heavily veined and shows lots of grains. Dimensional marble specifications include smooth textures, ease in crafting sculptures, hence highly manageable. It is a reasonably strong and durable stone. It takes good polish, popularly used as wall claddings, floors, skirting's, table tops, treads and risers, sculptures, artifacts, etc.

SPECIFICATIONS

Slabs:

210 x 140 CM+(18 / 20 / 30 MM Thick)

Tiles:

30x30, 40x40, 50x50, 30x60, 40x60, 60x60

Sandstone

Sandstone is a sedimentary stone that is typically the result of quartzite stone being eroded and redeposit by either wind or water. Sandstone mostly consists of quartz, silica, iron oxide and calcium carbonate and is durable, weather, acid and thermal resistant and has crushing strength. They can at most take a honed polish, and are used as garden and commercial landscapes, exterior wall cladding, etc. They come in an array of colors & shades and can be chiseled and dressed to a smooth surface in various attractive shapes.

SPECIFICATIONS

Slabs:
